Historical depth-to-water level measurements noted for 1999-2007

Continued From Page One

measurements for wells located in that county. Also tabulated are available total changes in water levels, in feet, for each observation well for the periods 1999 to 2009, 2004 to 2009, and 2008 to 2009.

Historical depth-to-water level measurements have produced a district average decline of -0.68 of a foot in 1999; an average decline of -1.14 feet in 2000; an average decline of -0.78 of a foot in 2001; an average decline of -1.06 feet in 2002; an average decline of -1.34 feet in 2003; an average increase of +0.74 of a foot in 2004; an average decline of -0.54 of a foot in 2005; an average decline of -0.91 of a foot in 2006; and an average decline of -0.20 of a foot in 2007.

The seal appearing on this document was authorized by C. Don McReynolds, P. G. 10246 on April 17, 2009.

Web poll results:

Low pressure center pivots common agricultural best management practice

"Which of these agricultural best management practices do you use on your farm?"

That's the question we asked last month on the High Plains Water District web poll, located at **www.hpwd.com**.

The following agricultural best management productions were available for selection:

- Contour farming.
- Tailwater recovery and reuse.
- Replacing irrigation ditches with pipelines.
- Gated and flexible pipe for field water distribution.
- Surge irrigation.
- Low pressure center pivot systems (LESA & LEPA).
- Subsurface drip irrigation.
- Furrow dikes, chiseling, and deep ripping.
- Other practices.
- I don't use any of these practices on my farm.

Approximately 80 percent of the respondents indicated use of low pressure center pivot systems while the remaining 20 percent indicated use of subsurface drip irrigation.

Last month's on-line comments included:

"LEPA, LESA, and drip make sense as the only technologies currently that can help us conserve the maximal amount of water."

"No-till farming should be considered by all farmers. It's amazing, now without wind moisture, how full the soil profile is, going into spring planting when trash is on top of the soil and it is not tilled."

The current web poll question, **"Do you plan to use less water in your landscape this spring and summer?"** will remain on the High Plains Water District's web site until mid-April.

Legislative pace to pick up during last weeks of 81st regular session

At press time, Texas lawmakers had less than 35 days remaining in the 81st regular legislative session to approve a state budget and consider a voluminous amount of legislation ranging from voter ID issues and illegal immigration to health/human services and environmental issues—just to name a few.

"Each legislative session has a distinct personality," says High Plains Underground Water Conservation District Manager Jim Conkwright.

"This session seemed to be off to a slower start because of the change in leadership in the House of Representatives." Yet, it feel certain that things will pick up during the last few weeks of the regular session. It always does."

Conkwright says most of the groundwater legislation referred to the House and Senate Committees on Natural Resources have been positive thus far.

These include:

Senate Bill 2120 relating to the management, operations, and review of groundwater conservation districts. A committee substitute for this legislation, also by Sen. Seliger, is expected to be introduced soon.

The anticipated committee substitute would establish a training program at the Texas Water Development Board in Austin (TWDB) for groundwater conservation district officials. Board members and general managers would be required to take a minimum of one hour training each year on topics relating to groundwater management.

The TWDB will review management plans and district rules to make sure they meet the DFC set by the groundwater management area. All districts would be required to amend their management plans and rules within one year of a DFC being set to ensure that it is being met.

It clarifies that the Texas Commission on Environmental Quality has authority to require that a management plan be in place before a district amends or changes its rules.

It would allow districts to adjust their managed available groundwater (MAG) to account for exempt use and known in-district demands according to state or regional water plans. Exempt users (oil and gas drilling) would have to report annual water use to districts.

The proposed legislation would require the State Auditor's office to conduct an audit of a district prior to enforcement action by the TCEQ.

It adds SB 2296 with additional language clarifying that districts that have been granted an extension of time to submit their management plans may not amend rules affecting groundwater production until their new management plans are in place.

Senate Bill 2296 relates to the timing of submittal of groundwater conservation district management plans.

Groundwater conservation districts are required to submit a revised management plan to the TWDB every five years; however, the most recent revisions must include the desired future condition/managed available groundwater adopted by the groundwater management area(s) in which the district is located. About 25 to 30 water districts in the state would have to adopt a revised management plan to comply with the statutory deadline and then submit another plan once the DFC/MAG was adopted.

As a result, the TWDB would have two management plans from each district to review. This legislation by Sen. Robert Duncan of Lubbock addresses this concern by requiring affected districts to submit only one management plan within a year of the MAG adoption.

"The High Plains Underground Water Conservation District has provided testimony before both the House and Senate Committees on Natural Resources this session. We thank the chairmen of the respective committees, Rep. Allan Ritter of Nederland and Sen. Kip Averitt of Waco, and their staff, for their willingness to work with groundwater conservation districts on proposed legislature.

"In addition, we specifically want to thank Sen. Kel Seliger of Amarillo, Sen. Robert Duncan of Lubbock, and their respective staff members who have worked with us to refine legislation this session," Conkwright said.
